About Me

Technical Writer with 4+ years of experience creating clear, user-focused documentation for software products. Experienced in developing product documentation, procedures, troubleshooting content, and structured content using XML/DITA. Familiar with SDLC processes, Agile practices, SME collaboration, documentation reviews, and Microsoft/MSTP-style writing principles.

My approach to technical documentation focuses on accuracy, usability, consistency, and making complex product information easier for users and developers to understand.

Core Skills

- Product Documentation
- User Guides
- Troubleshooting Documentation
- XML/DITA
- Structured Authoring
- Release Notes
- SDLC Documentation
- Technical Editing
- Content Review
- SME Collaboration
