

DITA/XML – Configure User Access

The following example represents the same user-access procedure using a DITA task structure.

```
<task id="configure-user-access">
```

```
<title>Configure User Access</title>
```

```
<shortdesc>
```

Add a user to a FlowCore project and assign the appropriate role.

```
</shortdesc>
```

```
<taskbody>
```

```
<prereq>
```

You must have Project Administrator permissions.

```
</prereq>
```

```
<steps>
```

```
<step>
```

```
<cmd>
```

Sign in to FlowCore.

```
</cmd>
```

```
</step>
```

<step>

<cmd>

Open the required project.

</cmd>

</step>

<step>

<cmd>

Select <uicontrol>Settings</uicontrol>.

</cmd>

</step>

<step>

<cmd>

Select <uicontrol>Users and Permissions</uicontrol>.

</cmd>

</step>

<step>

<cmd>

Select <uicontrol>Add User</uicontrol>.

</cmd>

</step>

</steps>

<result>

The user is added to the project with the selected permissions.

</result>

</taskbody>

</task>

What this demonstrates

- DITA task structure
- <task>
- <shortdesc>
- <prereq>
- <steps>
- <step>
- <cmd>
- <uicontrol>
- <result>
