

## FlowCore Enterprise 5.8 — Release Notes

# FlowCore Enterprise 5.8

**Release date:** September 2026

## What's new

### Workflow Templates

Administrators can now create reusable workflow templates for frequently used approval processes.

### Bulk User Management

Administrators can add, update, or deactivate multiple users from a single interface.

## Improvements

- Improved workflow execution performance.
- Added additional filtering options to workflow history.
- Improved error messages for failed workflow actions.

## API Changes

The Workflow Status API now returns the `updatedAt` field.

## Documentation updates

Updated the following documentation:

- Workflow Administration Guide
- User Management Guide
- Workflow Status API Reference

## Known Issues

Under certain conditions, workflow history may take several seconds to display after a workflow is completed.
