

Troubleshooting: Workflow Remains in "In Progress"

Problem

A workflow remains in **In Progress** even after all assigned tasks have been completed.

Symptoms

- Workflow status does not change to **Completed**.
- All assigned tasks show as complete.
- No error appears in the workflow history.

Possible Causes

1. A required approval is still pending.
2. A workflow rule is incomplete.
3. The workflow service is temporarily unavailable.

Resolution

Check pending approvals

1. Open the workflow.
2. Select **Activity**.
3. Review the approval history.
4. Identify any pending approval.
5. Complete or reassign the approval.

Check workflow rules

Review the workflow execution history to determine whether the final rule executed successfully.

If the problem persists

Collect the following information before contacting support:

- Workflow ID
- User ID
- Approximate time of occurrence
- Screenshot of the workflow status
- Workflow execution log
